

What is the Role of the Developmental Services Supports Coordinator?

Our DS SCs are highly trained professionals who provide a link to available services based on the individual's needs. Some of the activities performed by the Supports Coordinator are:

- Assess the needs of individuals
- Educate the individual and family on service options
- Develop Individual Support Plans (ISP)
- Locate both informal and formal supports and services
- Coordinate supports and services
- Monitor services to ensure satisfaction, health and safety, and that the individual receives appropriate and continuous care

Where Are These Services Provided?

Supports Coordination is provided to individuals living in a variety of settings and they can include:

- The individual's home
- Community Homes (Group Homes)
- Personal Care Homes
- Nursing Homes
- Private ICF-MR's
- State Centers
