Established 1990

**"United for
Recovery"
Westmoreland
County CSP
Est. 1990**

What is the Community Support Program (CSP)?

- CSP is an organized network of caring and responsible people who collaborate to improve opportunities for RECOVERY to everyone with mental illness and co-occurring disorders.
- CSP offers a beacon of HOPE that people can and do recover from mental illness by promoting acceptance, advocacy, support, choice, education and empowerment.

Your voice matters!

Westmoreland County CSP is the perfect platform to distribute and acquire education, resources, advocacy and connection.

CSP Meetings Include:

- Updates by the Westmoreland County BHDS Office
- Updates from the BH Medicaid provider Carelon
- Information about upcoming events, resources and services
- Legislative and process updates on benefits like Social Security, Dept. of Human Services, housing and transportation
- Presentations from our many county and state resources

The national Community Support Program is designed to help all with mental illness and co-occurring disorders reach their full potential, facilitate the recovery process and foster personal growth. The center of the wheel represents RECOVERY as a multidimensional concept. Fundamental components of CSP are in the middle circle and the 8 guiding CSP Principles are on the outer circle.
